

GHANDUR ATHALLAH ALPARIS

Fullstack Developer | Frontend Developer | Software Engineer

📍 Malang, Indonesia | 📞 +62 812-5941-9668 | ✉️ ghandurathallah10@gmail.com | 🔗 LinkedIn | 📁 GitHub

PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of hands-on experience building and deploying web applications across the full development lifecycle — from requirement analysis and UI/UX implementation to backend integration, testing, and production maintenance. Proficient in React, Next.js, NestJS, C# (ASP.NET), SQL Server, and PostgreSQL. Proven ability to collaborate with cross-functional teams and translate business requirements into scalable technical solutions. Strong foundation in engineering principles from Electronics Engineering degree, complemented by intensive fullstack training at Hacktiv8 Indonesia.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C#
Frontend	React.js, Next.js, AngularJS, jQuery, HTML5, CSS3, Tailwind CSS
Backend	Node.js, NestJS, ASP.NET (Core MVC), RESTful API, Entity Framework
Database	SQL Server (MSSQL), PostgreSQL, MongoDB, Supabase
DevOps & Cloud	Git, GitHub, Vercel, Railway, Amazon Web Services (AWS), Firebase
Tools	VS Code, Postman, Figma, Excel, Canva, Claude Code

WORK EXPERIENCE

PT Rekan Andalan Sukses

June 2023 – December 2024

Software Engineer | Frontend Developer | Jakarta, Indonesia

EMP (Electronic Manajemen Penyidik) Team — Feb 2024 – Dec 2024

- Redesigned the main interface of the EMP application using React.js and modern UI frameworks, improving usability and reducing user navigation time by approximately 35%.
- Developed backend modules using C# (ASP.NET Core MVC) and Entity Framework, implementing business logic for electronic case investigation workflows that supported 100+ active investigators.
- Designed and optimized SQL Server (MSSQL) database schemas, stored procedures, and complex queries, improving critical report generation speed by 40%.
- Built and integrated RESTful APIs connecting front-end interfaces with backend services, enabling seamless data flow across modules.
- Collaborated with business analysts and stakeholders to translate legal/investigative requirements into technical specifications, delivering 3 major feature releases on schedule.
- Performed systematic debugging, code reviews, and performance optimization across both frontend and backend layers.

E-Kerma Team — June 2023 – Jan 2024

- Translated UI/UX Figma designs into responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript, reducing design-to-code turnaround time by 30%.
- Integrated frontend interfaces with backend RESTful APIs, ensuring accurate real-time data rendering across 5+ application modules.
- Applied modern frontend best practices and researched emerging technologies to maintain code quality standards across the project.

PT Tusam Hutani Lestari

March 2025 – Present

IT Support | Admin Staff | Jakarta, Indonesia

- Provided technical support and troubleshooting for hardware, software, and network infrastructure serving 30+ staff members.
- Developed the company's official website (www.tusamhutanlestari.com) using TypeScript and Next.js, establishing the company's digital presence.
- Built the internal Sistem Pengarsipan Surat Digital (mail archiving system) to digitize and streamline document management workflows.
- Maintained IT documentation, system inventories, and monthly operational reports.

Freelance Web Developer

March 2025 – Present

Frontend Developer / Freelance | Jakarta, Indonesia

- Delivered 3 client web projects using Next.js, TypeScript, and Supabase, from initial requirement gathering through production deployment on Vercel.
- Developed Sistem Informasi Produksi Getah and Mirzuno Company Profile, providing clients with scalable, low-maintenance web solutions.

PROJECTS / PORTFOLIO

Sistem Pengarsipan Surat Digital

Tech Stack: *TypeScript, Next.js, Supabase, Vercel*

Digital mail archiving system enabling paperless document management with role-based access control and full-text search capabilities.

Sistem Informasi Produksi Getah

Tech Stack: *TypeScript, Next.js, Supabase, Vercel*

Production information system for tracking rubber latex output, inventory management, and production reporting for plantation operations.

Tusam Hutani Lestari — Company Profile Website

Tech Stack: *TypeScript, Next.js, Vercel*

Official company profile website with responsive design, company information, and contact integration.

Mirzuno — Company Profile Website

Tech Stack: *TypeScript, Next.js, Supabase, Vercel*

Corporate website with modern UI design, product showcase, and content management capabilities.

EDUCATION

Hacktiv8 Indonesia

January 2023 – May 2023

Full Stack JavaScript Immersive Program (Score: 79.3/100) | Jakarta, Indonesia

- Intensive 4-month bootcamp covering: Fundamental Programming, OOP, Data Structures, RESTful APIs, React.js, Node.js, and PostgreSQL.
- Final Project: Packer — a fullstack application; contributed as backend developer using Node.js and PostgreSQL.

State Polytechnic of Malang (Polinema)

August 2018 – August 2022

Bachelor of Electronics Engineering (GPA: 3.32 / 4.00) | Malang, Indonesia

- Concentration: Digital Electronics, Control Systems, Robotics, Power Electronics, Embedded Systems.
- Final Project: Implementation of Perturb & Observe algorithm for PV systems under partial shading conditions with SEPIC Topology Converter.

CERTIFICATIONS

Pengantar Pemrograman ASP.NET (Core MVC & EF) — Udemy

March 2024

Introduction to Web Development — Pacmann Academy

January 2024

Fullstack JavaScript Immersive — Hacktiv8 Indonesia

July 2023
